EDUCATION

Bellevue University | M.S. Data Science | 2026 – present

Long Island University – Post Campus, NY | B.S. Computer Science | 2022 - 2026

- GPA: 3.93 | Presidential Full-Tuition Scholarship | Honors Student | Study Abroad Scholar (Costa Rica)

EXPERIENCE

Data analyst and Program Manager | Literacy of Northern New York (Adult Education) | Sep 2026 – Present

- Analyze learner demographics, attendance, and pre- and post-test results in Excel to track progress, support grant reporting, and design targeted recruitment and retention strategies.
- Maintain and reconcile student records in ASISTS, the state adult education database.

Software Engineering Intern – Backend & TechOps | TransPerfect | Jul 2025 – Jul 2026

- Design and develop RESTful APIs using ASP.NET Core MVC, applying Repository Pattern, Clean Architecture, and Dependency Injection for maintainable, scalable systems.
- Configure Azure DevOps pipelines for CI/CD workflows; monitor application health and logs using Kibana dashboards and custom health-check endpoints.
- Manage SQL Server databases via Entity Framework Core (migrations, LINQ queries, query optimization); implement Redis caching to reduce DB load and improve response times.
- Collaborate in Agile sprints with senior engineers, participating in code reviews focused on performance, security, and API design best practices.

Computer Science & IT Tutor | LIU Post, NY | Sep 2023 – May 2025

- Tutored my peers in computer science related courses such as Game Development, Database Management, OOP.

Intern, Office of External Affairs | LIU Post, NY | Summer of 2023

- Supported the Director of External Affairs with partner outreach, scheduling, planning, and administrative work.
- Participated in and organized student trips to the United Nations events.

PROJECTS

PeopleBonder, Telegram Bot

NET, Docker, Nginx, Hetzner VPS · 2025

- Deployed a .NET bot to a Hetzner VPS, configuring DNS records, a TLS certificate, and Nginx to route webhook traffic to the application.
- Implemented command handling, scheduled daily question delivery, secrets management, and persistent state.

Banking System API

C#, ASP.NET Core, EF Core, SQL Server, Docker, JWT · 2024–2025

- Built a RESTful API through four progressive stages, from a console app to the Repository Pattern with an external currency API integration.
- Added JWT authentication, pagination, sorting, filtering, CSV content negotiation, Swagger documentation, and a Dockerized SQL Server.

Study Tracker App

ASP.NET Core MVC, EF Core, SQL Server, Docker · 2025

- Built a full-stack CRUD application with dynamic filtering, sorting, and pagination, containerized with Docker Compose.
- Documented the API with Swagger. Source: github.com/kazakovanodira/StudyTracker_Level1
